UNION TOOL CO.

Notice Regarding Orders and Lead Times

Carbide End Mills with Shank Diameters of 8 mm and Above

Dear Customers,

Due to changes in market conditions surrounding carbide end mills, we are currently receiving orders for our products at levels significantly higher than anticipated. This sharp increase in demand has caused orders for products with shank diameters of 8 mm and above to exceed our production capacity. As a result, lead times may be longer than usual.

While we are working to strengthen our production system, we may need to limit orders for certain products for the time being in order to maintain a stable supply.

We sincerely apologize for the inconvenience this may cause. We remain fully committed to expanding our production capacity and stabilizing supply, and we appreciate your understanding and cooperation.

Products Covered

Carbide end mills with shank diameters of 8 mm and above (outside diameters of 6.1 mm and above)

Request for Your Understanding

- Orders for certain products may be limited.
- Lead times may be longer than usual.

Once improvements in production and supply conditions have been confirmed, we will promptly inform you. We will continue to make every effort to minimize the impact on our customers.

If you have any questions, please contact our sales representative.
